

Are you a service user, patient or carer who has experience of PPI or INVOLVEMENT in Health

Personal and Public Involvement or PPI is about involving those who use services, or care for those who use services, with those who plan and deliver services. This involvement can sometimes relate to individuals (personal) or groups or the wider community (public).

-Your views and your voice are important-

- Find out about our Research Project
- Take part in a Focus Group and share **your** experiences
- Explain why **PPI is important**
- Tell us about the facilitators and barriers to PPI
- Let us know how we can make Personal and Public Involvement **more accessible**
